ACMV MAINTENANCE SPECIALIST

**BOUTIQUE FACILITIES
MAINTENANCE**

Boutique Facilities Maintenance (BFM)

When you hear “Boutique”, you can immediately associate with Specialised in bespoke or custom-made services for clientele in a niche market. This is an unique approach & services specially cater for Boutique Concept businesses from Boutique hotels to day spas, fitness centres, plastic surgeons, cosmetic dentists and more. With more than a decade of industry experience, M-Cube has the flexibility to provide excellent services, tailored to fit your specific working environment and corporate culture. Whether you decide on bundled or standalone facilities services, we design a package just for you which is visibly different, adding value to your business. The role of a Boutique Facilities Maintenance team is to assess what is requires and ensure that all legal requirements are adhered to as well as ensuring a regular maintenance check plan is in place. The maintenance can extend the life of your assets, achieve energy savings, create a more comfortable experience for your guests, and reduce the chance of an asset failing at the worst possible time. In the increasingly competitive world the last thing your business needs is downtime.

For all enquiries and concerns about your BFM, we provide a single point of contact to take care of your needs. Our BFM Specialist are available around the clock to handle your corrective maintenance needs. They act as an extension of your team to minimise budgetary impacts by :

- Troubleshooting problems over the phone (call avoidance)
- Tracking and enforcing warranties and prioritising service requests according to the impact on the safety, security and sales of your business.
- They will validate the service request and will only dispatch a technician to site when required.

Data Analytics

M-Cube CMMS (Computerised Maintenance Management System) is a powerful tool that allows our BFM Services team and clients to make knowledge-based business decisions because all of the information they need is readily available at their fingertips.

On Demand BFM

- ACMV (Air-Conditioning and Mechanical Ventilation)
- Mechanical & Electrical
