

mⁱcube[®]
ACMV MAINTENANCE SPECIALIST

A grayscale photograph of a worker in a white hard hat and safety gear working on industrial machinery in a factory setting. The worker is positioned in the foreground, facing right, and is using a tool to work on a piece of equipment. The background is filled with various pipes, valves, and machinery, creating a complex industrial environment. The overall tone is professional and technical.

Mechanical and Electrical Maintenance

There's much more to Mechanical & Electrical Maintenance than just looking after and managing your building systems. It's about managing your assets and maintaining the investment you've made in your buildings. That's where M-Cube is here to assist.

Our engineers are a multi-talented bunch. We work hard to get to know everything about your Mechanical & Electrical (M&E) maintenance needs and compliance so you can relax in the knowledge that you're in safe hands. Our teams are armed with the skills and expertise required to assess and maintain all your M&E plant and equipment; critical power, cooling, lighting, heating, air-conditioning, ventilation systems, LV and HV electrical distribution, boiler maintenance, generators, fire and intruder alarms, CCTV, lifts and escalators and water treatment. You name it, they're probably well versed in it.

The services we provide include; planned preventative maintenance, reactive maintenance, health and safety, minor works and projects, catering/kitchen equipment, fire extinguishers, emergency lighting, compliance works, statutory tests, including portable appliance testing (PAT), fixed wire testing and periodic tests.
